

AI DEV ARMY

HERDING ROBOTS INSTEAD OF REPETITIVE TASKS

[ACCESS GRANTED]

SYSTEM STATUS: ONLINE

01_THE_PROBLEM.EXE

THE TICKET LOOP

[ERROR] INFINITE RECURSION
DETECTED

- >_ Read ticket
- >_ Forget ticket details
- >_ Re-read ticket
- >_ Start coding wrong thing

02_THE_BIG_IDEA.MD

ROBOTS DO THE TYPING

A system where AI agents handle the boring parts. You stay in charge. You make the decisions.

HARD LIMIT: 3 ACTIVE TASKS

Friction is a feature, not a bug.
Constraints breed focus.

MEET THE ROSTER

5 ROLES. 1 HUMAN. 0 MEETINGS.

03_AGENT_PAT.CONFIG

PAT - THE WORKER

[CORE TOOL: CLAUDE]

</> Reads the investigation.

</> Writes the actual code.

</> Leaves a **FIX-SUMMARY**.

</> Doesn't complain at 2AM.

04_AGENT_MAT.CONFIG

MAT - THE BACKUP

[CORE TOOL: GEMINI FLASH]

Does exactly what Pat does. At the same time. Differently. Exists for approach comparison.

PAT STATUS: UNKNOWN TO MAT
HEALTHY COMPETITION. ZERO
HURT FEELINGS.

05_AGENT_NIKKE.CONFIG

NIKKE – THE DETECTIVE

[CORE TOOL: CLAUDE]

- 🔍 Reads tickets & logs.
- 🔍 Touches absolutely nothing.
- 🔍 Produces **INVESTIGATION.md**.
- 🔍 Hands you the map and stops.

06_AGENT_POIROT.CONFIG

POIROT – THE REVIEWER

[CORE TOOL: CLAUDE]

- 👉 Reviews Pat & Mat's work.
- 👉 Writes a verdict.
- 👉 Briefs you on the win.
- 👉 **NEVER FIXES ANYTHING.**

07_AGENT_WATSON.CONFIG

WATSON – THE MAPPER

[CORE TOOL: CLAUDE]

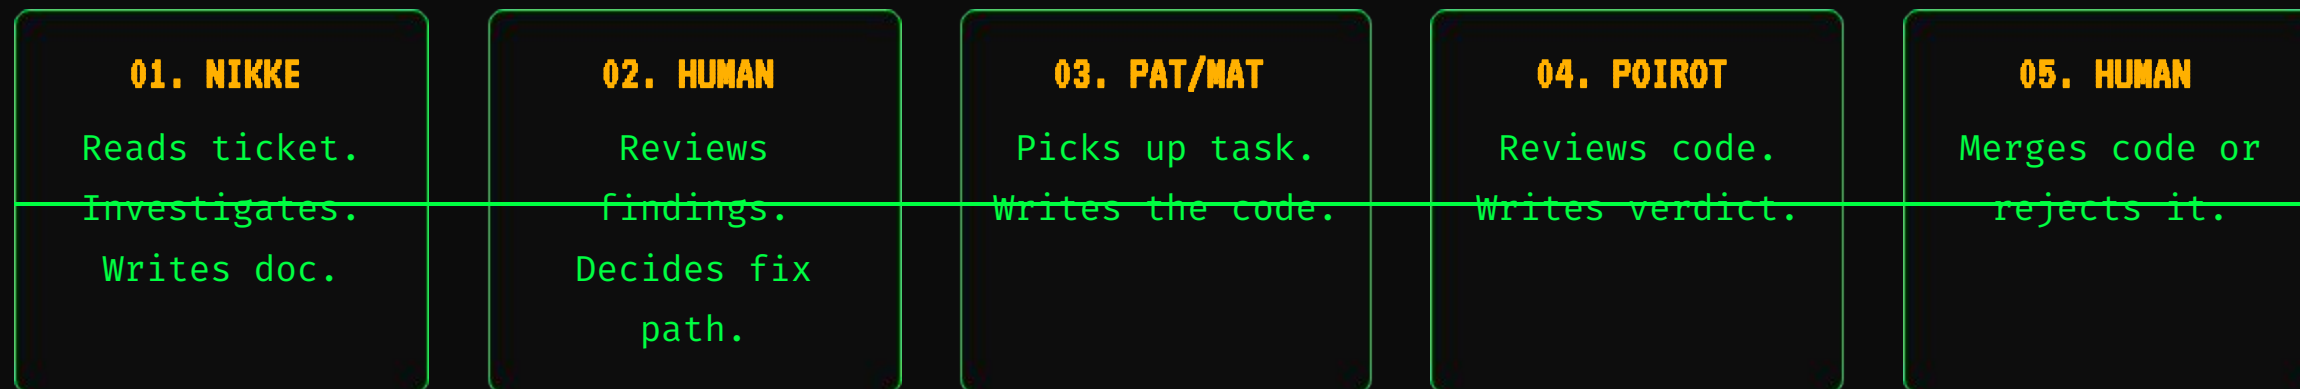

Called for huge codebases.
Explores file paths, entry
points, and modules.

Output: CONTEXT.md

Essential for orienting Pat and
Mat before the mission starts.

08_WORKFLOW.SH

NO AUTO-MERGES. EVER.

09_THE_DUEL.CMD

CLAUDE (PAT)

Analytical, concise, follows established patterns.

GEMINI (MAT)

Fast, creative, explores alternative logic paths.

VS

10_INFRASTRUCTURE.SYS

ISOLATED WORKTREES

Every agent gets its own isolated git worktree + tmux session.

- 🔧 No context bleeding.
- 🔧 No branch confusion.
- 🔧 Hard cap: 3 active.

11_SKILLS_MANIFEST.YML

PERSONAL REPO

Experiment freely. Big PRs allowed. Break things.

WORK REPO

Smallest change possible. Full tests required.

FRONTEND

Strict React/Next.js rules. UI consistency.

GO / PYTHON

[STATUS: COMING SOON] (The files exist, they're empty).

12_THE_REVIEW_MANIFESTO.TXT

| *FIXING IS NOT POIROT'S JOB AND POIROT KNOWS IT.*

Two AIs reviewing each other = defensive code soup.

A human in the loop = actual decisions.

13_SECURITY_PROTOCOL.INF

- 🛡 Secrets live outside the repo (~/.secrets/).
- 🛡 Agent artifacts are gitignored globally.

Nothing sensitive gets pushed.
[PROBABLY]

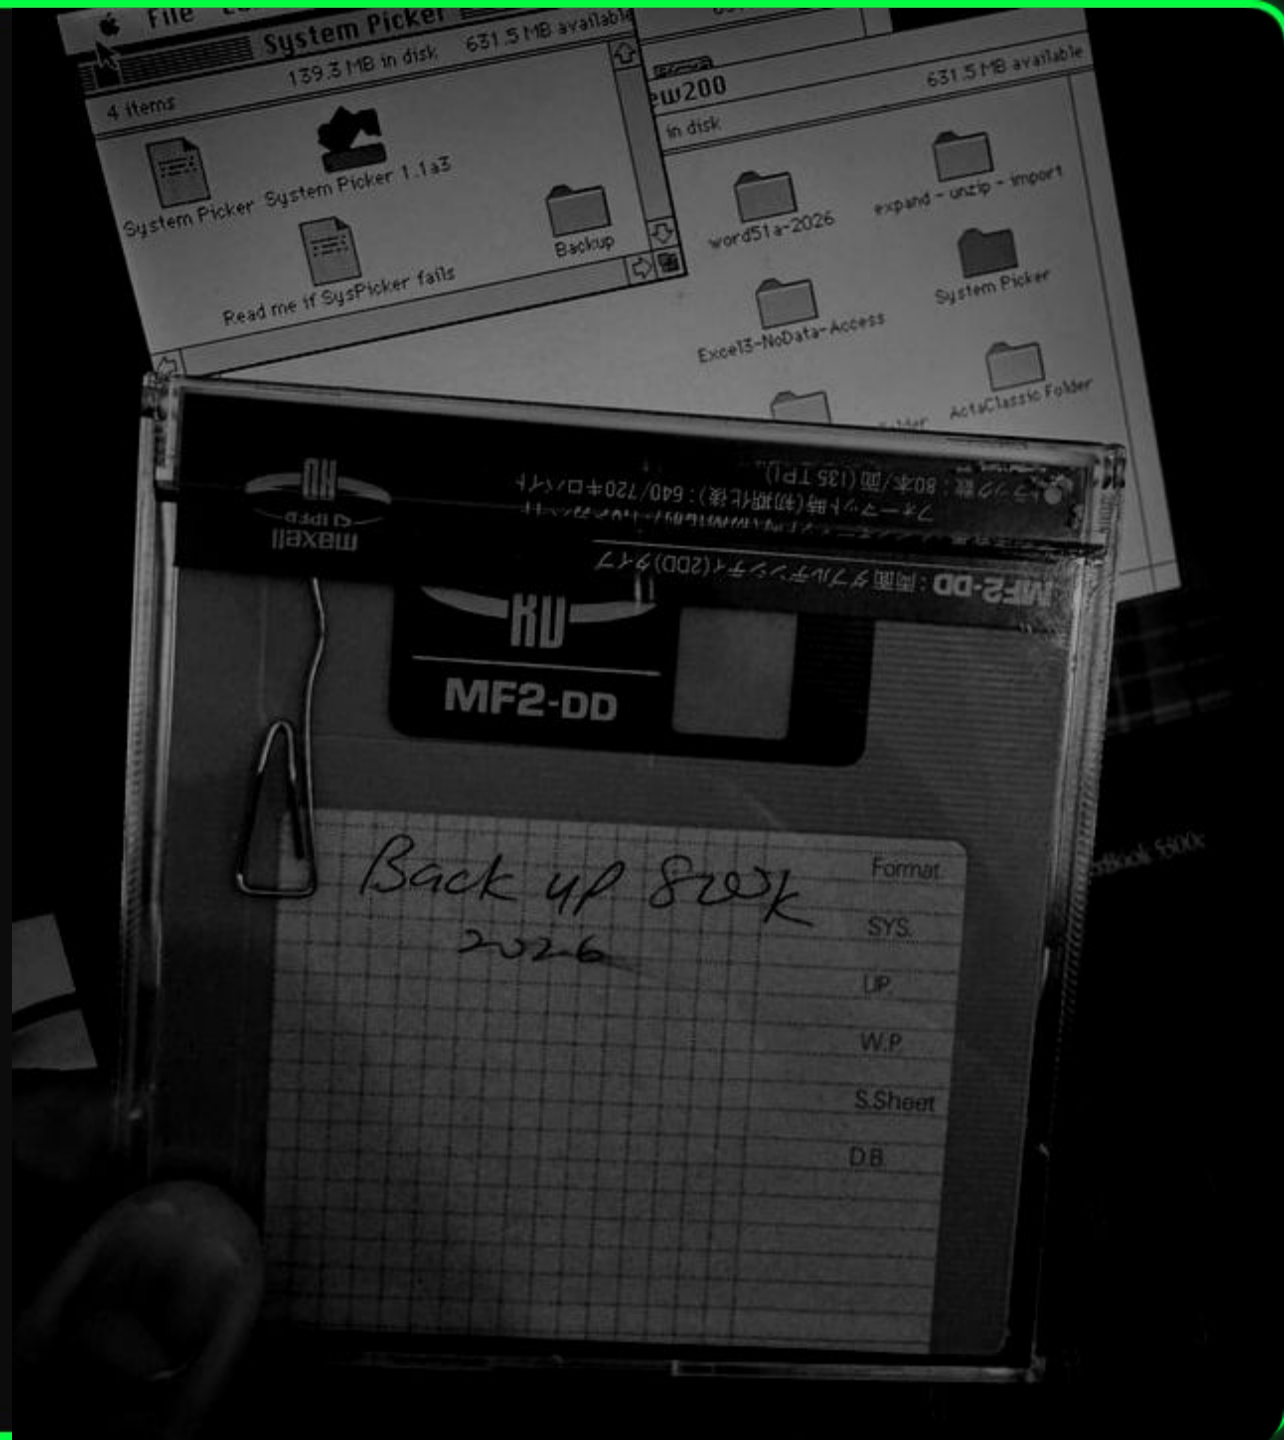

14_INSTALL.SH

ONE COMMAND SETUP

Symlinks scripts, configs, and skills to home directory. Adds bin to PATH. Installs global git hooks.

```
./install.sh
```

[WORKS ON NEW MACHINES] (Probably)

15_CONCLUSION_SUMMARY.LOG

0%

AUTO-MERGES

100%

CONTROL

- ✓ More focus.
- ✓ Less context switching.
- ✓ Bugs actually investigated.
- ✓ Healthy division of labor.

QUESTIONS?

OR JUST RUN ROSTER AND SEE THE MAGIC.

slides and repo will be public laterz
